

BIM Asset Manager

BIM ASSET Manager:

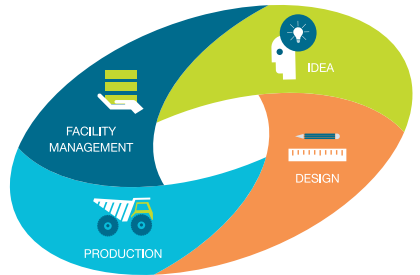

- Handle all building parts and categories from one or more building models.
- Connect models from Revit, Tekla, ArchiCAD and IFC
- Sync information with our add-ins between BIMeye and the origin software bi-directionally
- Create, change, sort and publish BIM-data on the objects in the project.

Your benefits working with BIMeye

According to existing users these are just some of your benefits working with BIMeye:

1. Increased efficiency
2. Enhanced collaboration
3. Reduction in data discrepancies
4. Full control and streamlining of BIM data
5. Greater predictability & transparency
6. Accelerates overall project delivery

BIMeye Apps

With BIMeye you have a series of customised apps giving you and your team the possibility to work smarter in an easy way, independent of any BIM or CAD programs. BIMeye allows all parties in a construction project access to the data all through the project planning and beyond to facility management.
