

Requirement Manager

Requirement Manager:

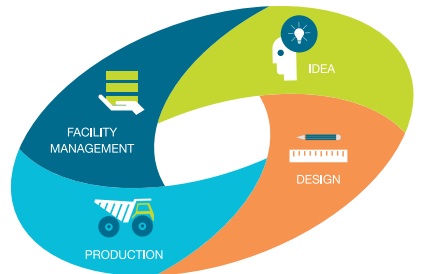

- Define the functional and technical requirements for the rooms in your project
- Track changes during the project with BIMeye's built-in revision functions
- All requirements in one place! Everyone has access to the latest requirements!
- You can quickly filter out requirements that are set for a specific discipline
- You can always access valid requirements in the web-interface of BIMeye

Your benefits working with BIMeye

According to existing users these are just some of your benefits working with BIMeye:

1. Increased efficiency
2. Enhanced collaboration
3. Reduction in data discrepancies
4. Full control and streamlining of BIM data
5. Greater predictability & transparency
6. Accelerates overall project delivery

BIMeye Apps

With BIMeye you have a series of customised apps giving you and your team the possibility to work smarter in an easy way, independent of any BIM or CAD programs. BIMeye allows all parties in a construction project access to the data all through the project planning and beyond to facility management.
